Cash and cash equivalents at September 30, 2013 decreased by $\frac{144.8}{100}$ from March 31, 2013 to $\frac{1667.1}{100}$ billion. This reflected $\frac{1210.8}{100}$ billion in net cash provided by operating activities, $\frac{1489.9}{100}$ billion in net cash provided by financing activities, an increase of $\frac{140.7}{100}$ billion in the effects of exchange rate changes on cash and cash equivalents and an increase of $\frac{11.3}{100}$ billion attributable to inclusion in consolidation.

(Cash flows from operating activities)

Net cash provided by operating activities increased by ¥234.2 billion to ¥210.8 billion for the six months ended September 30, 2013 from ¥23.4 billion used in the last year. This was mainly attributable to the turn from a decrease to an increase in trade notes and accounts payable.

This was mainly due to the turn from an increase to a decrease of net short-term borrowings.

No significant changes have been occurred or new issues have been identified with regard to the treatment of operating and financial issues by the Group during the six months ended September 30, 2013.

The research-and-development costs of the Group amounted to ¥234.3 billion for the six months ended September 30, 2013.

(5) Factors that may affect operating results, as well as the current status of and outlook on business strategies

The Group's worldwide automobile sales (on a retail basis) for the six months ended September 30, 2013 decreased by 1.5% from the last year to 2,439 thousand units.

The overall demand for vehicles decreased by 1.7% in the domestic market, while the number of vehicles sold in Japan increased by 3.6%, resulting in 315 thousand units, which accounted for a market share of 12.4%, an increase of 0.7% from the last year.

The overall demand for vehicles in China increased by 12.5%, while the number of vehicles sold in China decreased by 8.3% to 592 thousand units, which resulted in a market share of 5.8%, a decrease of 1.4% from the last year.

The overall demand for vehicles in the United States of America increased by 8.9%, and the number of vehicles sold in the United States of America increased by 14.5% to 623 thousand units, which accounted for a market share of 7.7%. Meanwhile, the number of vehicles sold in North America, including Mexico and Canada, increased by 13.8% to 800 thousand units.

The overall demand for vehicles in Europe decreased by 2.1%, and the number of vehicles sold in Europe decreased by 6.1% to 308 thousand units, which resulted in a market share of 3.6%.

The number of vehicles sold in other countries including ASEAN, Oceania, Africa, Central and South America and Middle East decreased by 8.4% to 424 thousand units.

For the six months ended September 30, 2013, although sales volume increased for new products in Japan, China and North America, this was offset by the decrease in volume in Europe due to difficult trading conditions particularly in Russia and in emerging markets. In addition, higher quality costs related to product recalls and manufacturing costs to enhance production capacity for future growth, impacted profit.

The Group remains committed to increasing production capacity and introducing new and attractive product, while maintaining financial discipline. These actions give the Group confidence that it can return to a path of sustainable growth.

(6) Analysis of sources of capital and liquidity

Cash and cash equivalents at September 30, 2013 decreased by $\frac{144.8}{100}$ billion (6.3%) from March 31, 2013 to $\frac{1667.1}{100}$ billion. This reflected $\frac{1210.8}{100}$ billion in net cash provided by operating activities, $\frac{1489.9}{100}$ billion in net cash provided by financing activities, an increase of $\frac{140.7}{100}$ billion in the effects of exchange rate changes on cash and cash equivalents and an increase of $\frac{11.3}{100}$ billion attributable to inclusion in consolidation.

Although we must closely monitor the liquidity in light of the rapid environmental changes in the financial markets, the Group considers that the necessary liquidity is sufficiently ensured with measures such as commitment line agreements with principal banks in the world, as well as cash and cash equivalents held by the Group.

A review of quarterly consolidated financial statements consists of making inquiries, primarily of management and persons responsible for financial and accounting matters, and applying analytical and other quarterly review procedures. A review is substantially less in scope than an audit conducted in accordance with auditing standards generally accepted in Japan.

We believe that the evidence we have obtained is sufficient and appropriate to provide a basis for our conclusion.

Auditor's Conclusion

Based on our review, nothing has come to our attention that causes us to believe that the accompanying quarterly consolidated financial statements do not present fairly, in all material respects, the consolidated financial position of Nissan Motor Co., Ltd. and its consolidated subsidiaries at September 30, 2013, and the consolidated results of their operations for the three-month and six-month periods then ended and their cash flows for the six-month period then ended in conformity with the accounting principles for quarterly consolidated financial statements generally accepted in Japan.

Emphasis of Matter

We draw attention to "Changes in accounting policies" to the accompanying quarterly consolidated financial statements, which describes the application of the IFRS 11 *Joint Arrangements* (released on May 12, 2011) by Some of the Company's foreign subsidiaries and affiliates apply, effective from the first quarter of the fiscal year ending March 31, 2014. Until the prior fiscal year, Nissan (China) Investment Co., Ltd., a consolidated subsidiary of the Company, had proportionally consolidated its joint venture Dongfeng Motor Co., Ltd., according to the IAS 31 *Interests in Joint Ventures*, but now applies the equity method to Dongfeng Motor Co., Ltd., effective from the first quarter of the fiscal year ending March 31, 2014.

Our conclusion is not qualified in respect of this matter.
