

Nissan Green Shop -Three declarations and actual activities-

Nissan Green Shop - Three Declarations

- 1) We shall strictly observe all laws, ordinances, and guidelines.
- 2) We shall minimize the environmental impact of our business activities.
- 3) We shall actively communicate with our customers on our environmental efforts.

Actual Activities

① Protecting the local water and soil

Oil leakage and energy loss are prevented by carrying out periodic inspections and cleaning of facilities such as oil separating tanks, etc.

② Separating and recycling waste

Dealerships are encouraged to reduce the amount of end waste by separating waste into categories, then recycling or otherwise appropriately processing them.

③ Correctly processing environmental contaminants

Converted oils, long life coolant(LLC), etc. are recycled or appropriately processed as industrial waste to prevent water pollution and soil contamination.

④ Responsibly processing ELVs

Vehicles that have reached the end of their lives are entrusted to reliable recycling companies, and correct processing is verified by an electronic manifest.

⑤ Appreciating the importance of resources and energy

The Nissan Green Shop system is actively involved in energy and resource saving activities such as water and energy conservation, and is promoting the effective utilization of limited resources.
