NISSAN'S CONTRIBUTION TO THE SUSTAINABLE DEVELOPMENT GOALS

GRI102-12

With the world population expected to reach nine billion by 2050, societies are facing a range of issues, such as climate change, poverty and ongoing urbanization. To deal with such issues, the United Nations has adopted a set of Sustainable Development Goals (SDGs), and companies have an increasingly important role to play in achieving these goals. The automobile industry, too, faces an increasingly important responsibility to provide value to society by delivering safe, secure and sustainable mobility for all. Nissan supports the SDGs and contributes toward the achievement of these goals through its initiatives.
